BCA-clinic  
Morellstraße 33, 3rd floor  
86159 Augsburg,  
Germany

31st March 2016

Dear Dr. Nicolaus and the BCA Clinic,

I am writing to thank you, Dr. Nicolaus and your wonderful team, for giving me my whole life back.

As you know, I have just had my latest test results and the level of Borrelia is minimal. I am working full time and loving my job, enjoying playing with my son and having fun socialising with friends again. All this has been achieved under your care and using the BCA herbal protocol.

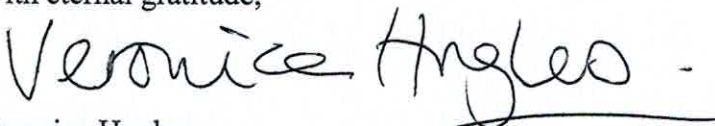

My little boy is also so much improved on the herbs that he loves going to school now. He can walk long distances on family outings, and he is calm, happy and no longer has pains, headaches or difficulty with school work. There was a time when I thought these little things were impossible.

When I came back to visit your clinic recently it was a deeply emotional trip for me. Every little thing reminded me how ill I had been the first time I came. I remembered feeling worried for myself, and terrified that my little boy might never experience a normal life at all.

You were the first doctor who ever sat and answered every single question I asked, never rushing to get rid of me, or brushing off questions as if they were unimportant. You were the first doctor who made sense to me and whose answers, in the fullness of time, have all turned out to be true.

Please fix this letter up somewhere in the clinic. I know exactly how your new patients feel, and I want them all to be able to read it. I want them to know that you really can get better from this terrible disease.

With eternal gratitude,

Veronica Hughes
